2. Perform LEFT JOIN.
3. Perform RIGHT JOIN.
4. Perform FULL OUTER JOIN (or equivalent).
5. Compare different types of joins.

Assignment 5: Subqueries

1. Write a single-row subquery.
2. Write a multi-row subquery.
3. Use correlated subqueries.
4. Use EXISTS and NOT EXISTS.
5. Use IN and NOT IN.

Assignment 6: Constraints

1. Implement PRIMARY KEY.

2. Implement FOREIGN KEY.
3. Use UNIQUE constraint.
4. Use CHECK constraint.
5. Use DEFAULT and NOT NULL constraints.

Assignment 7: Views & Indexes

1. Create and use a VIEW.
2. Update data through a VIEW.
3. Create an INDEX.
4. Drop a VIEW.
5. Drop an INDEX.

Assignment 8: Stored Procedures & Triggers

1. Create a stored procedure.
2. Create a function.
3. Create a BEFORE trigger.
4. Create an AFTER trigger.
5. Demonstrate trigger execution.

Mini Projects

1. Student Database Management System
2. Library Database
3. Hospital Database
4. Bank Database
5. Employee Payroll Database
6. Online Shopping Database
7. Inventory Management Database
8. College Management Database
9. Hotel Management Database
10. Railway Reservation Database
